

LABORATORY RECORDS + MEASUREMENT

LingoAcquire

Keep the signal.
Keep its context.

From recorded samples to reviewable physical readings.

MAP THE MEASUREMENT

Review channel identity, units, calibration and uncertainty.

ALIGN THE RECORD

Fit measured clock anchors and inspect event timing.

CHECK CONTINUITY

Verify original chunks, sample gaps and recoverable checkpoints.

RETAIN THE SESSION

Keep supervised test chronology alongside the exact source.

Recorded-data review tools. Physical acquisition and timing require equipment commissioning; full-field stereo-DIC is not established.

Your research perspective is welcome.
